

## SOLVING THE PROBLEM OF FOOD WASTE

OLIO is the world's only neighbour-to-neighbour food sharing app, and our mission is to solve the problem of food waste in the home & local community. We do this by connecting anyone with spare food – which can be households or local businesses – with neighbours living nearby who would like it. Globally, over one third of all the food we produce gets thrown away, which is worth over \$1 trillion. What few people realise however is that in the developed world, over half of all food waste takes place in the home, with the average UK family throwing away £800 of food each year - collectively adding up to £15bn. OLIO solves this with our award-winning mobile & web apps.

Over the past 2 years OLIO has grown from a local initiative in North London to a global movement. We now have over 465,000 users who have together shared well over half a million portions of food – with food being successfully shared in 32 countries and counting. Underpinning this incredible growth has been our volunteer programme, with over 19,000 people reaching out to spread the word about OLIO in their local community and rescue unsold food. OLIO is now looking to grow our core team as we embark upon the next exciting phase in our journey.

## JOIN OUR TEAM!

In order to accelerate OLIO to its next level in growth and impact, we are recruiting for a **React/React Native Developer**. You will report into Lloyd Watkin, **Lead Developer**. And you will be joining a team of 7 (including this role) – 2 backend developers, 3 front end developers, a product designer and a product manager. 3 of these positions are new recruits.

In this role you will be responsible for:

- Helping us transition from our current Ionic-based hybrid app to a new React Native platform
- Taking “ownership” of the features you develop and deliver to our users
- Developing, maintaining, our React-based webapp
- Providing feedback on briefs and designs
- Continuously thinking about how to improve the user experience across our products
- Keeping up to date with the latest guidelines and trends for React and React Native development
- Contributing back to the community, which is often “required” with React & React Native

Once you have proven yourself you will have great freedom and autonomy, coupled with an enormous opportunity for personal development. All of our roles are remote working roles, however for London based team members there is the ability to co-work as well. We live for our mission, but like to have fun along the way!

## IS THIS YOU?

Our ideal candidate will first and foremost be as passionate about our mission as we are! In addition to this, you will have the following experience and skills:

- A proven track record developing large scale React and React Native applications (in the case of React Native, from the ground up)
- Familiarisation with using and improving our build tools (currently we are using webpack)
- Unit and integration testing new features
- Evaluating new technologies and seeing if/how they could benefit our products and processes
- Ability to work with ES6 and start to work with future version of JavaScript as new features become available
- A ‘product manager’ mind-set, which means you seek to improve specs and designs where possible

You will be involved at the very earliest stages of our React Native development so your role will be very important in shaping the future and success of the project as a whole.

And all OLIO team members share these attributes:

- A self-starter with a ‘can-do’ attitude
- Resourceful and creative

- “Heads up” rather than “Heads down” approach, know when to ask for help
  - A problem solver
  - Thorough, able to move quickly and decisively but knowing when compromises make sense and when not
  - A ruthless ability to prioritise
  - Excellent communication skills - especially sharing knowledge and findings with the team
  - Ability to develop the best solution, even if this isn’t the solution you’ve proposed
- Fun to work with 😊

#### HOW TO APPLY

Please send your CV, a link to your Github or example projects, and covering email explaining why you are the right person for this role to [careers@olioex.com](mailto:careers@olioex.com). Please use the subject line – Application: React/React Native Developer
